

# SUPPORTING DECISION MAKING

## THE DECISION SUPPORT PROGRAMME

### Decision Support Programme

The Decision Support Programme is a joint piece of work across the HCC Public Health Evidence & Intelligence team to enable systems and services within Hertfordshire to answer complex, cross-cutting problems related to health and wellbeing. The programme works with stakeholders on a given issue, scoping, and researching the problem before developing recommendations for actionable interventions. A short version of the programme has helped East & North Hertfordshire CCG and East & North Hertfordshire Healthcare Partnership to design services to avoid emergency admissions within the heart failure population and more projects are underway.
